Randy's Shop Notes

Hello Folks, I hope this summer has been filled with fun flying or building adventures. I know it has smoked by like the whimsical wisps of smoke from one of Oshkosh's Air Show acts. I have learned a great deal about those big wind makers we call engines this summer and can't keep the dirt from under my nails.

We have our Airfield of Dreams, Fremont County Airport day coming up the 25th. I hope everyone has cleared the day to help with the pancake breakfast!

We need everyone because we should have a much better turn out than blossom festival. The commissioners have committed to advertising and have got, local police, boy scouts, as well as other government agencies to come out and participate. A high school band to boot! Should see some jumping houses for the little ones, so get your grand kids involved! We will finalize plans at our upcoming Wednesday night meeting.

Elsa, At the Barnstormers Restaurant, is putting on a great BBQ! BBQ Chicken , Baked Beans, Coleslaw, and for desert a Short Cake with Fruit medley topping. DON'T MISS IT!

Randy

Minutes From The EAA 808 August 2010 Mtg.

President White presiding

Guests: Carol-Ann Garrett (program presenter)

Old Business:

September 25th will be the pancake breakfast, from 7am to 10 am. Will be called the "Wings 'n Wheels Day" promotion. Dave Thompson is doing the organizing. There will be a military presence along with Doss Aviation and Car Clubs. Lunch will be served by Barnstormer's Restaurant. Plan on doing the same menu we usually do. Volunteers are REALLY needed – as we anticipate more than 200 breakfasts sold. There will also be model building in the chapter room and kids jumping houses.

Randy would like for members to voluntarily show their planes in a cordoned off area.

Assignments for the event will be discussed at the next chapter meeting.

Grant to apply for EAA event insurance.

Airventure:

Weather was an issue! Saw 5" of rain in 2 hours. EAA set up campers all over town where it was drier and provided both toilets and shuttles from those locations. There were 4 flying examples of builders RV12's at the show, and all good comments about the kits. The night show included a jet powered glider and fireworks, which got great review. Jack Rousch's jet demise on final was interesting. Young Eagles Sully & Sikes Q&A was very cordial. Sporties is running a promotion whereby if you graduate from a ground school class, Sporties will pay for one free flying lesson. There were 23 DC-3's in formation flight. Event registration numbers were down by 7%.

Treasurers Report:

Treasurer reported that we have \$XXXX total in the account.

There being no other business, motion made and seconded to adjourn.

Program Presented by Carol-Ann Garrett, who with a partner, has flown her 1993 J model Mooney around the world in a record time and average speed of 8 ½ days @ 115.5 mph.

Trip was done as a fund raiser for ALS research.

Total flying time was 158 hrs., 81 of which were at night and with 4 in IMC.

She has both a DVD and book available about the flight.

Upcoming Events

Date	Event

Tips 'N Tricks

This Month I would like to point out a couple more good videos available from the EAA.org website:

Installation of wire terminals and the proper technique used in crimping them on.

<http://www.eaavideo.org/video.aspx?v=590116930001>

Mr. Osterbuhr does a good job in showing what makes a good crimp job and the inspection points that someone should look for when examining a completed crimp.

Wheel bearing inspection and repacking:

<http://www.eaavideo.org/video.aspx?v=86367874001>

Mr. Carpenter shows how to disassemble, inspect, re-pack and then re-assemble the wheel bearings from a typical aircraft wheel, giving tips on what constitutes inspection problems.
